

ESC 2021 - STATISTICS

PROGRAMME

INVITED & ORAL PRESENTATIONS

SESSIONS	Programme Slots	Invited	Oral	Total
Session 01: Machine learning solutions to seismic problems: Join Session ESC-SSA	5	1	19	20
Session 02: Open and FAIR seismology - Consequences, challenges and opportunities	1		5	5
Session 03: Challenges due to massive generation of seismic data. Large-N experiments, fiber optic cables, and how users, data centres and applications will cope with data in the near future	1		2	2
Session 04: The cycle of observational seismology from Waveform Data Collection to scientific products	2		9	9
Session 05: The structure of the central Mediterranean: insights from seismological and geophysical data	2	2	6	8
Session 06: Bringing seismological issues to the public: a way to foster seismic risk best practice	2		7	7
Session 07: Seismicity and Seismotectonics in Central and Eastern Europe	3		12	12
Session 08: Seismic arrival time determination: The reliability of established and innovative automatic picking techniques compared to manual picking	2	1	5	6
Session 09: Advancing the (Re)use and preservation of Analog Seismic Data	1		2	2
Session 10: Seismic anisotropy and shear-wave splitting: achievements and perspectives	4	3	12	15
Session 11: From school seismology to citizen science	3		13	13
Session 12: Seismological and structural studies in Polar Regions and the cryosphere	4	2	10	12
Session 13: Seismological and geophysical imaging of shallow geological structures at different scales: challenges and perspectives	3		12	12
Session 14: Imaging and modeling 3D fault complexities in FAULT2SHA	2	1	5	6
Session 15: Earthquake hazard assessment towards seismic risk mitigation in Urban Areas	5		25	25
Session 16: Advances in models, observations and verification towards operational earthquake forecasting	3		12	12
Session 17: Crowdsourcing and macroseismology: reliability, applications and developments	3		10	10
Session 18: Towards operational forecasting of earthquakes and early warning capacity for more resilient societies	6	1	28	29
Session 19: Physics of earthquakes and seismic sources	3	2	11	13
Session 20: New seismological workflows: from event detection to earthquake forecasting	1		2	2
Session 21: Physics of earthquake preparation process: from laboratory experiments to earthquake forecast	3		9	9
Session 22: The 2020 European seismic hazard and risk model: new developments and future directions for seismic hazard and risk assessment in Europe	2		10	10
Session 23: Swarm-like and earthquake sequences driven by local transients in tectonic and volcanic areas	3		15	15
Session 24: Physical and statistical models and pattern recognition techniques applied to foreshocks, aftershocks and multiplets at different scales, from laboratory experiments to real-scale observations	1		3	3
Session 25: Research on array seismology and earthquake mechanisms at seismic experimental sites	1		3	3
Session 26: Seismicity and geodynamics in Corinth Gulf and other Near Fault Observatories	3	2	7	9
Session 27: Networks and open data in seismology the example of HELPOS: Hellenic plate observing system	3		9	9
Session 28/35: Tsunamis and fast seismo-geodetic rupture inversion in Europe and worldwide: Observations, theory and numerical analyses for hazard and risk assessment	4		13	13

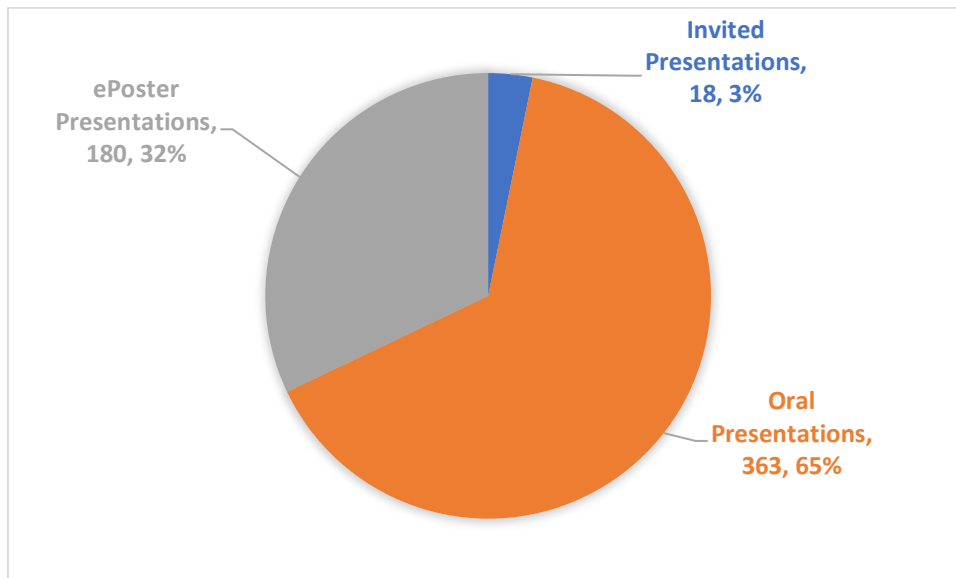

SESSIONS	Programme Slots	Invited	Oral	Total
Session 29: GNSS/InSAR inputs for geodynamic modeling, tectonic strain and seismic hazard in the Mediterranean	3	1	7	8
Session 30: New challenges for urban engineering seismology	4		16	16
Session 31: When science meets industry: Advances in engineering seismology stemming from practice	6	2	19	21
Session 32: Induced seismicity: observations, modelling, monitoring, discrimination and risk management strategies	2		7	7
Session 33: Advances in single station and array methods for subsurface characterization onshore and offshore	2		11	11
Session 34: Earthquake Induced Landslides: from triggering to stabilization, methods and techniques of monitoring	1		4	4
Session 36: Functionality of seismometer and accelerometer in ground-motion recording	1		1	1
Session 37: Historical earthquake data in seismology practice	2		10	10
Session 38: General Seismology - Recent strong earthquakes	4		12	12
TOTAL	101	18	363	381

POSTER PRESENTATIONS

POSTER SESSIONS		Posters
POSTER SESSION I	Session 02: Open and FAIR seismology - Consequences, challenges and opportunities	1
	Session 03: Challenges due to massive generation of seismic data. Large-N experiments, fiber optic cables, and how users, data centres and applications will cope with data in the near future	1
	Session 28/35: Tsunamis and fast seismo-geodetic rupture inversion in Europe and worldwide: Observations, theory and numerical analyses for hazard and risk assessment	1
	Session 36: Functionality of seismometer and accelerometer in ground-motion recording	1
	Session 12: Seismological and structural studies in Polar Regions and the cryosphere	7
POSTER SESSION II	Session 07: Seismicity and Seismotectonics in Central and Eastern Europe	11
	Session 08: Seismic arrival time determination: The reliability of established and innovative automatic picking techniques compared to manual picking	1
	Session 10: Seismic anisotropy and shear-wave splitting: achievements and perspectives	8
	Session 13: Seismological and geophysical imaging of shallow geological structures at different scales: challenges and perspectives	8
	Session 18: Towards operational forecasting of earthquakes and early warning capacity for more resilient societies	8
	Session 30: New challenges for urban engineering seismology	4
POSTER SESSION III	Session 01: Machine learning solutions to seismic problems: Join Session ESC-SSA	3
	Session 04: The cycle of observational seismology from Waveform Data Collection to scientific products	8
	Session 15: Earthquake hazard assessment towards seismic risk mitigation in Urban Areas	10
	Session 19: Physics of earthquakes and seismic sources	4
	Session 23: Swarm-like and earthquake sequences driven by local transients in tectonic and volcanic areas	6
	Session 24: Physical and statistical models and pattern recognition techniques applied to foreshocks, aftershocks and multiplets at different scales, from laboratory experiments to real-scale observations	7
	Session 25: Research on array seismology and earthquake mechanisms at seismic experimental sites	5
Session 32: Induced seismicity: observations, modelling, monitoring, discrimination and risk management strategies	3	
POSTER SESSION IV	Session 05: The structure of the central Mediterranean: insights from seismological and geophysical data	6
	Session 09: Advancing the (Re)use and preservation of Analog Seismic Data	7
	Session 16: Advances in models, observations and verification towards operational earthquake forecasting	3
	Session 17: Crowdsourcing and macroseismology: reliability, applications and developments	6

POSTER SESSIONS		Posters
	Session 22: The 2020 European seismic hazard and risk model: new developments and future directions for seismic hazard and risk assessment in Europe	8
	Session 26: Seismicity and geodynamics in Corinth Gulf and other Near Fault Observatories	5
	Session 33: Advances in single station and array methods for subsurface characterization onshore and offshore	3
	Session 37: Historical earthquake data in seismology practice	6
POSTER SESSION V	Session 06: Bringing seismological issues to the public: a way to foster seismic risk best practice	2
	Session 14: Imaging and modeling 3D fault complexities in FAULT2SHA	4
	Session 21: Physics of earthquake preparation process: from laboratory experiments to earthquake forecast	8
	Session 27: Networks and open data in seismology the example of HELPOS: Hellenic plate observing system	7
	Session 29: GNSS/InSAR inputs for geodynamic modeling, tectonic strain and seismic hazard in the Mediterranean	3
	Session 34: Earthquake Induced Landslides: from triggering to stabilization, methods and techniques of monitoring	3
	Session 38: General Seismology - Recent strong earthquakes	10
