

The Psycholinguistics of Bilingualism

Would you ever expect that learning a **foreign language** might affect how you use your **native language** how you **think** or even how you **feel**?

To learn more about how frequent use of two languages may impact **language processing cognition and emotion** join our poster presentation!

on **MAY 25** in **210** (Museum) anytime between **12:30** and **15:30**

The Postgraduates of the MA Specialization “Linguistics: Theory and Applications”

BILINGUALISM & PSYCHOLINGUISTICS LAB
